SDL Executive Committee visits the Vaal Campus

On Wednesday, 1 November 2017 the Research Focus Area Self-Directed Learning (SDL) Executive Committee visited our colleagues on the Vaal Campus, in order to invite researchers not working within research entities, to consider whether SDL could form a research home for themselves. One aim with the workshop was to provide colleagues with more information on SDL, and the seven research subareas. During the energetic workshop we explored the value of doing research within such a supportive community of practice.

Due to prior commitments, Prof Charlene du Toit-Brits (SDL subarea leader) could not partake in this visit.
