Die nuutste SDL nuus...

SDL-lede het prof Josef de Beer se werkswinkel, *Becoming an Established (NRF-rated) Researcher: Affordances and Pitfalls*, op Dinsdag, 10 April 2018 bygewoon. Die werkswinkel het waarde toegevoeg tot kollegas se verstaan van die vyf narratiewe wat by die NRF-aansoek vir gradering ingesluit moet word. Hierdie narratiewe bied kritiese lesers agtergrond vir jou akademiese loopbaan en hoe jou navorsingsfokus ontwikkel het. Verder het prof De Beer gefokus op die skryfstyl vir hierdie narratiewe.

On Tuesday, 10 April 2018, SDL members attended Prof Josef de Beer's workshop on *Becoming an Established (NRF-rated) Researcher: Affordances and Pitfalls*. The workshop added value to colleagues' understanding of the five narratives that should be included in the NRF application for rating. These narratives provide critical readers background for your academic career and how your research focus has developed. Furthermore, Prof De Beer focused on the writing style for these narratives.
