

COMBER - Creating optimal working relationships in a research group

COMBER members met to learn from each other how to create optimal working relationships in a research group. They did this experientially by doing activities that build trust, create a safe space for sharing, and encourage honest, open communication. They also brainstormed the characteristics of an optimal group in small groups, using Padlet to record their discussion to share with the other members. The experiential approach enabled members to learn group facilitation skills by putting themselves in the shoes of the research participants, as well as to start learning how to use the TEAMS platform in research.

COMBER-lede het vergader om by mekaar te leer hoe om optimale werksverhoudinge binne 'n navorsingsgroep te skep. Hulle het dit deur middel van ervaring gedoen deur aktiwiteite te doen wat vertroue bou, 'n veilige ruimte geskep om ervarings te deel en eerlike, oop kommunikasie aanmoedig. Hulle het ook in klein groepies 'n dinkskrum gehou oor die kenmerke van 'n optimale groep, met behulp van 'n Padlet om hulle besprekings op te neem om met die ander lede te deel. Die ervaringsbenadering het lede in staat gestel om groepfasiliteringsvaardighede aan te leer deur hulleself in die skoene van die navorsingsdeelnemers te plaas, asook om te begin leer hoe om die TEAMS-platform in navorsing te gebruik.

Happy Birthday!
to everyone celebrating their birthday this month.
