

Strategic planning workshop

On 3 February COMBER held their 2022 strategic planning meeting where COMBER members had the opportunity to interact with each other and set goals and targets both individually and as a team to help the unit grow and reach greater heights. During the meeting, colleagues tackled the challenges facing researchers, students and research during a Covid-19 era. Colleagues thought outside the box as a team to find solutions to help students accomplish their dreams and to help researchers work effectively in a more efficient way to do research within COMBER.

COMBER het op 3 Februarie hulle vergadering vir strategiese beplanning vir 2022 gehou waar COMBER-lede die geleentheid gehad het om skouers te skuur en as individue sowel as 'n span doelstellings en doelwitte te stel om die eenheid te help om groter hoogtes te bereik. Kollegas het tydens die vergadering uitdagings aangepak wat navorsers, studente en navorsing tydens 'n Covid-19-era moet hanteer. Kollegas het as 'n span buite die boks gedink om oplossings te kry om studente te help om hulle drome waar te maak en om navorsers te help om effektief en op 'n meer doeltreffende manier te werk om navorsing binne COMBER te doen.
