World Café

SDL's year started with a bang! We hosted our first World Café on the 28th of January 2019. This was a fun-filled, event that provided ample opportunity for valuable discourse. It provided the attendees with the opportunity to voice their opinions on everyday matters regarding SDL, it also created an environment to learn from others' experience and expertise. The event also focused on doing some introspection and assessment of SDL's functionality as viewed by the attendees. This provided valuable insights to further progress and contribute to SDL as research entity's operations and outstanding achievements. Some of the tools and methods used during the discourses included: barometers, SWOT analyses and De Bono's hats.
